ELEMENTS REQUIREMENTS (see also Clarifications on the next page)

Jumps

1. Full rotation: signs < and << indicate an error. The base values of the jumps with a sign < are listed in the column V of the SOV table. The jump with a sign << is evaluated with SOV for the same jump one revolution less.
2. Correct take-off edge in F/Lz: signs “e” and “!” indicate an error. The base values of the jumps with the sign “e” are listed in the column V of the SOV table. The sign “!” allows to keep full original base value of the jump. If both signs < and “e” are applied for the same jump, the base values are listed in the column V1 of the SOV table.

Spins

1. For flying spins (with no change of foot and only one position) of both Short Program and Free Skating the following is required: a clear visible jump. The sign “V” indicates that this requirement is not fulfilled. The base values of spins with the sign “V” are listed in the column V of the SOV table.
2. The base values of spin combinations with only 2 basic positions (at least 2 revolutions in each of these positions) are also reflected in the column V of the SOV table.

STEP SEQUENCES

Types of difficult turns and steps: twizzles, brackets, loops, counters, rockers, choctaws.

Minimum variety includes at least 5 difficult turns and steps, none of the types can be counted more than twice.

Simple variety includes at least 7 difficult turns and steps, none of the types can be counted more than twice.

Variety includes at least 9 difficult turns and steps, none of the types can be counted more than twice.

Complexity includes at least 11 difficult turns and steps, none of the types can be counted more than twice, 5 types must be executed in both directions.

Use of body movements means the visible use for a combined total of at least 1/3 of the pattern of any movements of arms, head, torso, hips and legs that have an effect on the balance of the main body core.

Two combinations of difficult turns are considered to be the same if they consist of the same turns done in the same order, on the same edge and on the same foot.

SPINS

A difficult spin variation of position is a movement of the body part, leg, arm, hand or head which requires physical strength or flexibility and that has an effect on the balance of the main body core. Only these variations can increase the Level. There are 11 categories of difficult variations, among them 3 in camel position based on direction of the shoulder line: camel forward (CF) – with the shoulder line parallel to the ice; camel sideways (CS) – with the shoulder line twisted to a vertical position; camel upward (CU) – with the shoulder line twisted more than vertical position. If the free leg drops down for a long time while preparing for a difficult camel variation, the corresponding Level feature is still awarded, but the Judges will apply the GOE reduction for “poor/awkward/unaesthetic position(s)”.

“Change of foot executed by jump” & “Jump within a spin without changing feet”: are awarded only if the skater reaches a basic position within the first 2 revolutions after the landing.

“Both directions immediately following each other in sit or camel spin”: execution of spins in both directions (clockwise and counter clockwise) that immediately follow each other will be counted as a Level feature for sit and camel basic positions. Long curves of exit after the first part or entry into the second part are reflected in GOE. A minimum of 3 revs in each direction is required. A Spin executed in both directions as above is considered as one Spin.

“Difficult variation of flying position in flying spins/spins with a flying entry”: is awarded only if the flying position is really difficult and the skaters reaches a basic position within 2 revolutions after the landing. Normal flying camel entry does not block a possibility of counting a difficult flying entry as a feature.

Windmill (illusion) will be considered as a Level feature only the first time it's attempted.

JUMPS

Flip is taken-off from a backward inside edge, **Lutz** is taken-off from backward outside edge; Technical Panel decides on the take-off edge and indicates errors with signs “e” and “!”. In cases of serious errors (sign “e”) the base value of the jump and the GOE are reduced, in cases of smaller errors (sign “!”) the original base value stays and the GOE is reduced.

In Short Program jumps which do not satisfy the requirements (including wrong number of revs) will have no value, but will block a jumping box, if one is empty; if a combination of two double jumps is not allowed (Sr. Men & Ladies, Jr. Men), the jump with the original lesser value (before any consideration of signs <, <<, e) will not count (e.g. 2Lz+2T*, 2T*+2Lo, 2Lz<+2T*, 2F<<+2T*).

Short Program, Repetitions: If the same jump is executed twice as a solo jump and as a part of the jump combination, the second execution will not be counted (if this repetition is in a jump combination, only the individual jump which is not according to the above requirements will not be counted).

Free Skating, extra jump elements: If an extra jump(s) is executed, only the individual jump(s), which is not according to the requirements will have no value. The jumps are considered in the order of execution.

LEVELS OF DIFFICULTY, PAIR SKATING, SEASON 2017/18

ELEMENTS REQUIREMENTS (see also Clarifications on the next page)

Solo and Pair Spin combinations

The base values of spin combinations with only 2 basic positions (at least 2 revolutions in each of these positions) are reflected in the column V of the SOV table.

Jump elements

Both partners must fulfill requirements for jump elements in Single Skating. If these requirements are not fulfilled by one or both partners, signs and GOE reductions are the same.

CLARIFICATIONS: LEVELS OF DIFFICULTY PAIR SKATING, season 2017/18

TWIST LIFTS

Feature 1) (Lady's split): each leg straight or almost straight at least 45° from the body axis;

Feature 5) (Man's arms): straight or almost straight, going sideways and reaching at least shoulder level.

LIFTS

Take-off: Simple: includes but is not limited to change of handhold on ascent of lift.

Difficult: includes but not limited to: Somersault take off, small lift going immediately into a Pair lift take-off without the Lady touching the ice between two lifts, one hand take-off, Spread Eagle, Ina Bauer or Spiral by one or both partners as the entry curve, inside Axel take-off in 5ALi and 5SLi.

Landing: Simple: different landing foot (not automatically considered), change of hold on descent.

Difficult: includes but is not limited to: Somersaults, variation in hold, partner positions and/or direction of landing, one hand landing, Spread-Eagle position of the Man during dismount.

Carry: Simple: duration at least 3 seconds.

Difficult: includes at least one of the following features: during the carry the Man for at least 3 sec. skates on one foot or holds the partner on one arm or performs crossovers or performs Spread Eagle or a similar move.

Difficult variation of Lady's position: a movement of leg, arm, or upper body which requires physical strength or flexibility and that has an effect on the balance of the main body core. Only these variations can increase the Level.

Change of hold/Lady's position requires one full revolution of the Man before and after this change. If a change of hold and a change of Lady's position are executed at the same time, only one Level feature will be awarded.

Variation of the take-off/landing, change of hold/Lady's basic position and difficult variation of the Lady must be significantly different from the previously attempted variation/change to be awarded as a Level feature. One arm dismount can be counted as a feature only once per program.

Features "**change of hold/Lady's position/rotational direction**" are not awarded if change is interrupted by carry. Feature "**one-hand-hold of the Man**" is not awarded if both arms of the Lady are touching the Man.

STEP SEQUENCES

Types of difficult turns and steps: rockers, counters, brackets, twizzles, loops and choctaws.

Same definition of minimum variety, simple variety and variety as for single skating; requirements must be fulfilled by both partners.

Use of body movements means the visible use for a combined total of at least 1/3 of the pattern of any movements of arms, head, torso, hips and legs that have an effect on the balance of the main body core.

Crossing at least 3 times of the partners for at least 1/3, but not more than 1/2 of the sequence and **not separating** for at least half of the pattern: only one of the two features (but not both) can be awarded.

Two different combinations of 3 difficult turns (rockers, counters, brackets, twizzles, loops) executed by both partners with a clear rhythm within the sequence.

DEATH SPIRALS

Death spiral has a Level and value if both partners execute at least 1 rev in the death spiral position (knees of the Man clearly bent, his toe anchored and arm fully extended; Lady's head must reach, at least briefly, the level of her skating knee). For a higher Level both Lady and Man must stay in the "low" position for 1 or more full revs.

Lady's "low" position: for inside Death Spirals, the lowest hip or buttock and head should not be higher than her skating knee; for outside Death Spirals – head should not be higher than her skating knee and bodyline between knee of skating leg and head should be flat or shallow arch.

Man's "low" pivot position: buttocks not higher than the knee of the pivot foot.

Any part of the Death Spiral with a higher Lady's or Man's position is not valid for Level features 2).

Change of arm hold by the Lady or Man is allowed, but is no longer a Level feature.

Change of pivot is considered as the end of the Death Spiral.

Entry, exit: The difficult entry position must be performed while both partners are on the entry curve and the Lady and/or the Man are moving from a difficult entry position directly and without delay to a Death Spiral position.

Exit: starts when the Man bends his "holding" arm at the elbow; ends: when the Lady comes to vertical position.

SOLO SPINS

Level feature "**Difficult entrance into a spin**" does not include regular backward entry, but still includes regular flying camel entry as long as it has a clear fly. Clarifications for Spins in Singles are also valid for Pairs (when applicable).

JUMPS, THROW JUMPS, TWIST LIFTS

In Short Program jumps, throw jumps and twist lifts which do not satisfy the requirements (including wrong number of revs) will have no value, but will block a corresponding element box, if one is empty.

In Free Skating, if an extra jump(s) is executed, only the individual jump(s), which is not according to the requirements will have no value. The jumps are considered in the order of execution.

III. Updated Guidelines for marking +GOE of Single/Pair Skating Elements (positive aspects)

These guidelines are tools to be used together with the minus GOE charts. The final GOE of a performed element is based on the combination of both positive and negative aspects. It is important that the final GOE of an element reflects the positive aspects, as well as any possible reductions that may apply.

The final GOE of an element is calculated considering first the positive aspects of the element that result in a starting GOE for the evaluation. Following that a Judge reduces the GOE according to the guidelines of possible errors and the result is the final GOE of the element.

To establish the starting GOE Judges must take into consideration the bullets for each element. It is at the discretion of each Judge to decide on the number of bullets for any upgrade, but general recommendations are as follows:

FOR + 1 : 2 bullets

FOR + 2 : 4 bullets

FOR + 3 : 6 or more bullets

IV. Updated Guidelines in establishing GOE for errors in Short Program and Free Skating

Elements with no Value are indicated to the Panel of Judges. GOE of such elements does not influence the result. In case of multiple errors the corresponding reductions are added. However in Pair Skating the reduction applied for a mistake of one partner or the **same** mistake by both partners remains the same.

Program Components

As a guideline the score ten (10) should not be awarded for any of the components in a program containing a **Fall or Serious** error.

Step sequence pattern: It must be visible and identifiable and should be performed by using almost the full ice surface (e.g. straight line, serpentine, circle, oval or similar shape) ~~either in it's length from short barrier to short barrier or twice in its width from long barrier to long barrier.~~
